AI-Augmented Software Engineer · Full-Stack & Automation

SUMMARY

Software engineer who builds with AI and builds AI tooling. Shipped a custom **MCP server** for Fathom AI before an official integration existed, and runs the full SDLC inside **Claude Code**. Full-stack on **TypeScript**, **React / Next.js** and **PostgreSQL / Supabase**, with production systems that have processed **1,539** applications, digitized **11,368** documents and cut manual work **80%**.

TECHNICAL SKILLS

AI Engineering	Claude Code (full SDLC), Model Context Protocol (MCP) server development, Anthropic API, LLM application integration, context engineering, rules / skills / custom commands
Languages & UI	TypeScript, JavaScript, SQL, Shell scripting (basic), React, Next.js, Vite, Tailwind CSS, shadcn/ui, Zustand, TanStack Query, React Hook Form, Zod
Backend & Data	REST API design, authentication, webhooks, PostgreSQL, MySQL, Supabase
Automation & Ops	n8n, GoHighLevel (CRM), Manatal (ATS), business process automation, Vercel, Azure App Service, CI/CD, Git, Vitest, Cypress, Postman

AI ENGINEERING & DEVELOPER TOOLING

Fathom AI MCP Server — custom, self-built — **Model Context Protocol**

Local MCP server exposing Fathom AI meeting notes and action items to Claude Desktop and Claude Code — built before an official integration existed.

AI-driven software delivery workflow — **Claude Code**

Primary development environment across the full lifecycle — requirements, architecture and stack selection, sprint planning, context engineering (rules, skills, custom commands), CI/CD and deployment.

Diabetes Meal Assistant — LLM application — diabetes-meal-assistant.vercel.app

Next.js app using Google Gemini to analyze meal descriptions, with Supabase caching to cut repeat model calls.

EXPERIENCE

VizServe Private Limited — Jan 2025 – Present

System Engineer I · Remote — Jan 2026 – Present
Associate System Developer — Jan 2025 – Jan 2026

Own three production systems end-to-end — stakeholder requirements, architecture, build, test, deploy, maintain.

Online Admission System Revamp — HFSE International School — **Jun 2025 – Present**

Stack: Next.js, React, TypeScript, Supabase (PostgreSQL), TanStack Query, Zod, Tailwind CSS, shadcn/ui

- Replaced a legacy admissions portal with a self-service parent portal that has processed **1,539 enrollment applications** across 3 academic years and served **888 parents and guardians** in AY2025 alone.
- Digitized **11,368 document uploads** behind validated submissions and a Pending Actions dashboard, and cut repeat data entry with auto-saved drafts and prior-year carry-over.

Recruitment Process Automation & Manatal ATS — **Sep 2025 – Jan 2026**

Stack: n8n, Manatal ATS, REST APIs, webhooks, WordPress (Elementor)

- Configured Manatal ATS around company hiring workflows and built a WordPress portal wired to its REST API — screening fell from **3 days to same-day** for **200+ monthly applicants** and manual data entry dropped **80%**.
- Automated background and reference checks in n8n, dispatching to **100+ candidates weekly** and lifting response rates **25%**.

Student Information System — **Apr 2026 – Present**

Stack: Next.js, React, TypeScript, PostgreSQL, Supabase

- Consolidated spreadsheet-based school operations into one platform and automated report card production — teachers enter raw scores, the system computes grades and renders the printable card, collapsing a **multi-day per-term process to minutes**.

HFSE Web Properties & Online Store — **2025 – Present**

Stack: WordPress, Elementor, HitPay, Manatal REST API

- Redesigned the school's main website and built the HFSE GEG careers portal at careers.hfse.edu.sg, whose Elementor application form posts applicants straight into Manatal — no application is re-keyed by hand.
- Launched a HitPay storefront and inventory for the group's uniform and supplies shop — 7 product categories with cart, search and checkout — and designed the store page — families now order and pay online (hapistore.hfse.edu.sg).

Integrations: Anthropic, Supabase, GoHighLevel, Manatal, Cloudinary, Outlook, Discord, Resend, Calendly, ClickUp, Fathom AI.

EDUCATION & CERTIFICATIONS

Laguna University — BS Information Technology — **Aug 2019 – Jul 2024**

Building RAG Apps Using MongoDB, MongoDB · Introduction to Agent Skills, Anthropic — **Oct 2026**

Frontend Developer Training Program, Codebility — **Jul – Dec 2024**
